

PEDESTAL SIZE**NOTE**

The PEDESTAL command is not currently operational, so this command has no effect.

PURPOSE

Specifies the vertical height of the pedestal in subsequent 3-d plots.

DESCRIPTION

The size is in units of the vertical axis variable on the 3-d plot.

SYNTAX

PEDESTAL SIZE <size>

where <size> is a number or parameter in units of the 3-d vertical axis variable that specifies the size.

EXAMPLES

PEDESTAL SIZE 2000

PEDESTAL SIZE 4500

PEDESTAL SIZE 0.0025

DEFAULT

The default size is $(z_{\max} - z_{\min})$ where

z_{\max} = the data maximum for the vertical axis variable;

z_{\min} = the data minimum for the vertical axis variable.

SYNONYMS

None

RELATED COMMANDS

PEDESTAL	=	Allows/suppresses the pedestal for 3-d plots.
PEDESTAL COLOR	=	Sets the pedestal color for 3-d plots.
3D-PLOT	=	Generates a 3-dimensional data or function plot.
EYE COORDINATES	=	Sets the location of the eye for 3-d plots.

APPLICATIONS

3-d plotting

IMPLEMENTATION DATE

Pre-1987
