MINOR ... TIC MARK NUMBER

PURPOSE
Specifies the number of minor tic marks to appear between major tic marks on an axis.

DESCRIPTION
DATAPLOT can automatically scale the axis and select an appropriate number of major and minor tic marks. However, it is sometimes desirable to override the default choice and to specify the number of minor tic marks directly.

SYNTAX
MINOR <prefix>TIC MARK NUMBER <value>
where <prefix> is one of the following:
  no prefix       refers to all 4 sides;
  the prefix X    refers to both horizontal sides;
  the prefix Y    refers to both vertical sides;
  the prefix X1   refers to the lower horizontal side;
  the prefix X2   refers to the upper horizontal side;
  the prefix Y1   refers to the left vertical side;
  the prefix Y2   refers to the right vertical side;
and <value> is an integer number or parameter that specifies the desired number of minor tic marks.

EXAMPLES
MINOR TIC MARK NUMBER 5
MINOR XTIC MARK NUMBER 6
MINOR YTIC MARK NUMBER 4
MINOR TIC MARK NUMBER

NOTE
A MINOR TIC MARK NUMBER command with no arguments reverts the setting to default; thus MINOR XTIC MARK NUMBER with no arguments reverts the bottom horizontal tic labels to on. A MINOR TIC MARK NUMBER command with no prefix refers to all 4 sides; thus MINOR TIC MARK NUMBER OFF suppresses tic mark label for all 4 frame lines. MINOR TIC MARK NUMBER with no prefix and no arguments reverts the tic label settings on all 4 sides to default.

DEFAULT
DATAPLOT selects an appropriate number of tic marks based on the data.

SYNONYMS
MINOR TIC NUMBER is a synonym for MAJOR TIC MARK NUMBER, as in MINOR TIC NUMBER 6.

RELATED COMMANDS
MAJOR TIC MARK NUMBER = Specifies the number of major tic mark numbers to appear on an axis.
LIMITS = Specifies the axis minimum and maximum values.
TIC MARK = Specifies whether or not tics are drawn.
TIC MARK OFFSET = Sets the offset for the first and last tic marks.

APPLICATIONS
Neat axes
