

**PEDESTAL COLOR****NOTE**

The PEDESTAL command is not currently operational, so this command has no effect.

**PURPOSE**

Specifies the color of the lines which constitute the pedestal in subsequent 3-d plots.

**SYNTAX**

PEDESTAL COLOR <color>

where <color> is a string or an integer number or parameter that specifies the desired color.

**EXAMPLES**

PEDESTAL COLOR GREEN  
PEDESTAL COLOR YELLOW  
PEDESTAL COLOR

**NOTE**

The PEDESTAL COLOR command with no arguments reverts the pedestal color to default.

**DEFAULT**

The default is black (but the default is for the pedestal lines themselves to be off.)

**SYNONYMS**

None

**RELATED COMMANDS**

PEDESTAL	=	Allows/suppresses the pedestal for 3-d plots.
PEDESTAL SIZE	=	Sets the pedestal height for 3-d plots.
