

BAUD**PURPOSE**

Specifies the baud rate (i.e., the transmission rate) from the host to the terminal (in units of bits/second = 10 x characters/second).

SYNTAX

BAUD <n>

where <n> is a number or parameter that specifies the desired baud rate.

EXAMPLES

BAUD 9600

BAUD 1200

BAUD

NOTE 1

This command is not needed, and has no effect, for most graphics devices. Some older terminals, specifically the Tektronix 4014, needed to set this value correctly in order for screen erases to have a sufficient delay before starting the next plot.

NOTE 2

The BAUD command with no arguments sets the default baud rate.

DEFAULT

The default baud rate is 1200.

SYNONYMS

None

RELATED COMMANDS

ERASE DELAY = Sets the delay for screen erasure.

COPY DELAY = Sets the delay for screen hardcopying.

APPLICATIONS

Tektronix terminals

IMPLEMENTATION DATE

Pre-1987
