

HOST LINK**PURPOSE**

Specifies the communications link to the host.

DESCRIPTION

This command receives almost nil usage. The implementors of DATAPLOT on your computer should have adjusted the link specification to the correct setting. An incorrect setting has no consequence (at this time) for any of DATAPLOT's other commands.

SYNTAX

HOST LINK <type>

where <type> specifies the communications link.

EXAMPLES

HOST LINK PHONE

HOST LINK NETWORK

DEFAULT

The default host link is phone.
