RING BELL

PURPOSE
   Rings the bell (immediately) on all the currently active graphics devices.

DESCRIPTION
   Some devices, particularly off-line devices, do not support this option. The RING BELL command is intended for terminals. It is typically used to notify the analyst that DATAPLOT has completed some action.

SYNTAX
   RING BELL <number>
   where <number> is an integer number or parameter that specifies the number of times to ring the bell.

EXAMPLES
   RING BELL
   RING BELL 3

NOTE
   RING BELL with no arguments is equivalent to RING BELL 1.

DEFAULT
   None
