SET HELP LINES

PURPOSE
Define the number of lines to be printed to the screen when a HELP command is entered.

DESCRIPTION
The HELP command prints the help information one screen at a time. It then waits for a carriage return (or a "NO" to terminate the printing) to continue printing the help information.

SYNTAX
SET HELP LINES <value>

where <value> is a positive integer number or parameter that specifies the number of lines for one screen.

EXAMPLES
SET HELP LINES 20
SET HELP LINES 50

DEFAULT
Help screens are listed 20 lines at a time.

SYNONYMS
None

RELATED COMMANDS
HELP	=	Access on-line help.
SET LIST LINES	=	Define number of lines to a screen for the LIST command.
