

TAGUCHI SN+ PLOT

PURPOSE

Generates a Taguchi signal-to-noise plot for the “larger is better” case.

DESCRIPTION

The Taguchi SN+ plot answers the question: “What level of the independent variable yields the “best” value of the response (as measured by the largest value of the signal-to-noise ratio)?” The “+” in SN+ stands for “larger is better.” For this “larger is better” case, the signal-to-noise ratio is defined as:

$$SN = -10 \times \log_{10} \left(\frac{\sum \frac{1}{y^2}}{N} \right) \quad (\text{EQ 2-34})$$

where N is the number of observations in the subsample and y is the data observations in the subset. The Taguchi SN+ plot consists of the following:

Vertical axis = the Taguchi S/N value for each sub-group;
Horizontal axis = sub-group designation.

A reference line is drawn for the full sample S/N ratio.

SYNTAX

TAGUCHI SN+ PLOT <y> <x> <SUBSET/EXCEPT/FOR qualification>

where <y> is the response (= dependent) variable that contains the raw data values;

<x> is an independent variable that contains the sub-group identifications;

and where the <SUBSET/EXCEPT/FOR qualification> is optional.

EXAMPLES

TAGUCHI SN+ PLOT YIELD CATALYST

TAGUCHI SN+ PLOT Y X SUBSET MATERIAL 4

DEFAULT

None

SYNONYMS

The word TAGUCHI is optional (i.e., SN+ PLOT is a synonym for TAGUCHI SN+ PLOT).

S/N+ and SNL are synonyms for SN+.

RELATED COMMANDS

TAGUCHI SN+ (LET)	=	Compute the Taguchi SN+ statistic for a variable.
TAGUCHI SN PLOT	=	Generates a (target; variable is dependent on mean) signal-noise plot.
TAGUCHI SN- PLOT	=	Generates a (smaller is better) signal-to- noise plot.
TAGUCHI SN00 PLOT	=	Generates a (target variable is independent of the mean) signal-to-noise plot.
MEAN PLOT	=	Generates a mean plot.
SD PLOT	=	Generates a standard deviation plot.
CONTROL CHART	=	Generates a mean, range, standard deviation, P, NP, C, or U control chart.
Q CONTROL CHART	=	Generates a Quesenberry control chart.
CHARACTERS	=	Sets the types for plot characters.
LINES	=	Sets the types for plot lines.
SPIKES	=	Sets the on/off switch for plot spikes.
