HORIZONTAL SPACING

PURPOSE
Specifies the horizontal spacing between characters on a line for subsequent TEXT commands.

DESCRIPTION
The horizontal spacing between characters is from the visible bottom right of a character on a line to the visible bottom left of the succeeding character on the same line. The width of the characters themselves is not counted (that is controlled by the WIDTH command). The horizontal spacing is in decimal units of 0 to 100. A horizontal spacing of 0 would be negligibly small while a horizontal spacing of 100 would be full screen horizontal distance.

SYNTAX

EXAMPLES
