

VERTICAL SPACING

PURPOSE

Specifies the vertical spacing between text lines from subsequent TEXT commands.

DESCRIPTION

The vertical spacing between text lines is from the visible bottom of a character on one line to the visible top of a character on the next line. The height of the characters themselves is not counted (that is controlled by the HEIGHT command). The vertical spacing is in decimal units of 0 to 100. A vertical spacing of 0 would be negligibly small while a vertical spacing of 100 would be full screen vertical distance.

SYNTAX

VERTICAL SPACING <value>

where <value> is a number or parameter in the decimal range 0 to 100 that specifies the desired vertical spacing.

EXAMPLES

VERTICAL SPACING 10
 VERTICAL SPACING 3
 VERTICAL SPACING 2.55
 VERTICAL SPACING H

NOTE

The VERTICAL SPACING command with no arguments reverts the vertical spacing to the default.

DEFAULT

The vertical spacing is 1.0.
